Compact67

Description

The Compact 67 I/O modules for fieldbus provide a reliable solution for connecting industrial controllers to I/O devices in harsh environments.

Compact67 I/O modules with IP67 housing and standardized installation can operate in harsh dust, underwater, and vibration condition. These features make them ideally suited for many applications, such as material handling equipment and automated assembly machinery etc.

The functions of supporting PNP and NPN signal input, embedded bright LED diagnosis help maintenance personnel to easily judge I/O, module and network status.

Features

- Classic design realizes space savings for directly mounting to machine
- Fast and reliable plug and socket connection MiniChange (7/8"), MicroChange (M12)
- Support PNP and NPN input
- Free selection I/O configuration
- LED status indication
- Online diagnosis of modules and channels
